

**TECHNICAL BULLETIN
No. 0126**

**Oil Cooler Plate
Heavy Duty K Transmission**

Waterous announces a new oil cooler plate on Heavy Duty K Transmissions (used on CM, CS, CG, CX and HL pumps).

Beginning on September 1, 2017, all orders received for Heavy Duty K Transmissions will have the new oil cooler plate unless equipped with hydraulic drive with SAE Class C input shaft.

This feature was added as transmissions in many international markets require an oil cooler provision. Waterous incorporated the design and now offers it to all our customers.

Items added:

- Oil cooler plate
- Intake and discharge cooling lines
- Drain plug on discharge cooling line to drain cooling plate.

Information:

- Mounting: Avoid the cooling lines when fabricating mounting brackets.
- Cooling Line Sizes: 3/8" plastic tubing (factory installed).
