WATEROUS FIRE PUMP DRAIN VALVES

DESCRIPTION: WATEROUS HAS TWO TYPES OF MANIFOLD DRAIN VALVES AVAILABLE:

Table 1. Drain Valves

Type	Description	Mounting	For Use on Pump Models	Assembly Number	Dimensional Drawing
Manifold	Panel Mounted (1)	Pump Control Panel	All	61756-1	DPL82087
	Cable Operated (2)	On C20, TC20 or W Transmissions or Separate	All	71803-5	

NOTES:

1. Panel mounted assembly 61756-1 is available for all pump models. It is mounted on the pump control panel below the lowest point on the pump. It is controlled by a short rod through the panel by push-pull operation. Eight 1/4 NPT ports may be piped to any of the drain ports on the pump. The valve is furnished with a panel plate and mounting hardware, the OEM furnishes all piping and fittings.
2. Cable operated assembly 71803-5 is normally mounted on the right front pad on C20, TC20 & W series transmissions but it may also be separately mounted anywhere below the lowest point on the pump making it available for use on all pump models. It is controlled by a cable with a push-pull handle mounted at a convenient height on the pump control panel. Eight 1/4 NPT ports must be piped correctly in order for the valve to operate properly. The valve is furnished with a panel plate, handle, control rod and mounting bracket. The OEM furnishes all piping and fittings. The valve is shipped loose to avoid damage during shipping.

SPECIFY A DRAIN VALVE AS FOLLOWS:

VALVE TYPE

Panel Mounted or Cable Operated (Transmission Mounted)
